

CHOICE Program

Choosing Heightened Options for Individually Centered Education (CHOICE)

The mission of CHOICE is for students to improve their school commitment through increased academic, personal, social, and career growth. CHOICE provides 9th and 10th grade students with an educational alternative that is focused on real-life, hands-on, career-based learning within a smaller classroom setting. CHOICE staff members aim to be character builders and excellent role models for students to become responsible, productive members of society.

CHOICE curriculum is oriented toward two integrated areas: STEM (Science, Technology, Engineering, and Mathematics) and Humanities (Language Arts, Social Studies, Social Sciences, and Arts). Health and Physical Education will be offered as well. Students will be involved in various service learning experiences in the community.

Regular Schedule

First Period	8:30 - 9:25	English/Language Arts
Second Period	9:35 - 10:25	Occ Ed Elective
Third Period	10:30 – 11:25	Science
